Profile

I am a passionate PHP Developer with expertise in software development lifecycle and a focus on web development. I excel in requirement analysis, coding, testing, and delivering high-quality applications. I have a strong track record of meeting client expectations and providing solutions that enhance user experience.

Education

- MCA

Guru Gobind Singh Indraprastha University

2013 - 2016
- BCA

Bhupendra Narayan Mandal University, Delhi

2008 - 2011

Employment

- Web Developer

The Webplant Pvt Ltd, Delhi

Mar 2017 - Present

- Controlling development of PHP back-end for dynamic database driven websites; preserving program modules including operational support, problem resolution, production support, preventative and corrective maintenance and Social media integration
 - Plugin building enhancements
 - Designing, coding, developing, debugging and testing system specifications for Website maintenance
 - WordPress design conversion & development projects as well as liaising with users for requirement gathering; preparing functional specifications and low-level design documents
 - Application updating
 - Code review
 - Framing & documenting software solutions through flowcharts, layouts, diagrams, charts, code comments and clear code for given technical specifications; installing application software and deploying customizations and contributing to code reviews
 - Supporting bug fixing, maintaining store procedures and executing system enhancements according to user requirements for the application created as well as executing procedures for creation of wireframes and prototypes for new user interfaces
 - Building recommendations towards development of new code or for reusing of existing code; assisting in designing and development of relational databases
 - Plugin building for supporting back-end design
 - Defining architecture considering real time constraints, functional requirement & non-functional requirements; ensuring reliability & quality of software as well as reporting overall status of project to the client and senior management
 - Providing post-implementation, application maintenance and enhancement support to the client with regards to the product; conducting UAT at client site to help them understand and solve deployment and usability related issues
- Web Developer

Nethues Technologies, Delhi
